Ex.No.15	**Building anonymous FTP Scanner using ftplib module**
DATE:	

AIM:

To build an anonymous ftp scanner using ftplib module in python.

Introduction:
FTP Scanner:
A tool that automatically scans IPs/hosts for active FTP servers. It tests connectivity and credentials, reporting successful logins and vulnerabilities.
ftplib:
A built-in Python library for working with the File Transfer Protocol (FTP). It allows connecting to FTP servers, logging in, listing directories, and transferring files.

ALGORITHM:

1. Start.
2. Import the `ftplib` module.
3. Specify the FTP server hostname.
4. Connect to the FTP server.
5. Log in using the username **anonymous** and password **anonymous**.
6. If the login is successful:
    - Display the login status.
    - Display the server's welcome message.
    - Display the directory listing.
7. Close the FTP connection.
8. If the login fails, display an error message.

PROGRAM:

```
import ftplib

def anonymous_login(hostname):
    try:
        # Connect to the FTP server
        ftp = ftplib.FTP(hostname)
        # Login using anonymous credentials
```

```
        response = ftp.login('anonymous', 'anonymous')
        print(response)
        # Check whether anonymous login is successful
        if "230" in response:
            print("\n[*] FTP Anonymous Login Succeeded.")
            print("Server:", hostname)
            # Display welcome message
            print("\nWelcome Message:")
            print(ftp.getwelcome())
            # Display directory listing
            print("\nDirectory Listing:")
            ftp.dir()
    # Close the FTP connection
        ftp.quit()
    except Exception as e:
        print("Error:", e)
        print("\n[-] FTP Anonymous Login Failed.")
# Main Program
hostname = "ftp.be.debian.org"
anonymous_login(hostname)
```

SAMPLE OUTPUT:

```
230 Login successful.

[*] FTP Anonymous Login Succeeded.
Server: ftp.be.debian.org
```

Welcome Message:

220 FTP Server Ready

Directory Listing:

drwxr-xr-x 2 ftp ftp 4096 Jan 10 2026 debian

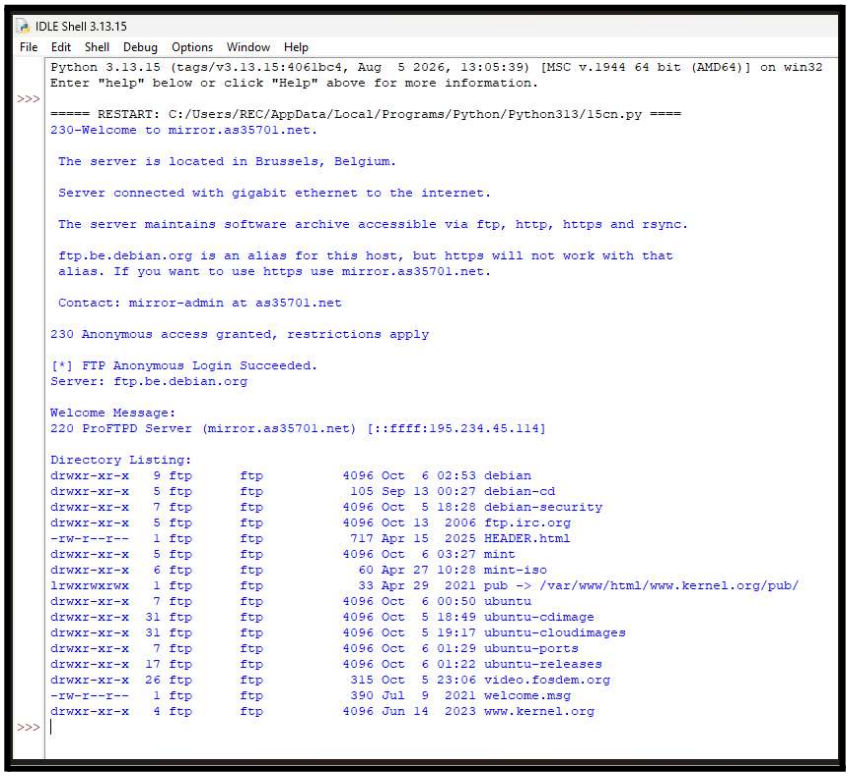

drwxr-xr-x 2 ftp ftp 4096 Jan 10 2026 cdimage

drwxr-xr-x 2 ftp ftp 4096 Jan 10 2026 project

-rw-r--r-- 1 ftp ftp 512 README.txt

221 Goodbye.

OUTPUT:

RESULT: Thus an anonymous ftp scanner using ftplib module was built and executed successfully.
